Are you supportive of the Do you have any comments on the proposed change that you would like to share? proposed changes to allow construction noise to start at 6:00 a.m. rather than 7:00 a.m.? Yes Yes As a resident who lives next to a current development, I can say that the noise and level of intrusive dust and shaking is Nο relentless and has been going on for almost two full years now. I do not support this change. No Seems unreasonable to punish the general population by changing the time to 6. I can't imagine being near a building site and being woken up by the relentless noise of power saws, air nailers and equipment noise. Imagine a piece of equipment beeping every time it reversed. No I sympathize with the heat in summer but they could also do split shifts. Yes No No How about just letting it go to 10pm, instead, and leaving the 7am start? They should start at 6 in the morning and end at 3:00 in the afternoon, being summer it gets hot, so start early. No one really listen s to our advice anyways. Yes Yes No 7 AM is already early enough for noise. Yes I think this is a fantastic idea. I truly support it and so does everyone else that l've chatted to about this. Yes Yes Yes While I feel it would be good for them to start earlier, I hope there would be some stipulation that they are not to arrive at the site earlier. A 6am start time would likely mean they arrive before that and the noise of their vehicles, chatter, and clanging of Yes tools would be happening before that start time. No Only that if it somehow goes through the dates should be July and August only. No need for any additional months due to No extreme heat. Yes No Nο Yes Yes Yes Yes Yes Yes Yes I don't wanna hear that BS that early and on top of that salmon arm already has too many people. No Yes There are other steps and things to do to minimize the heat related issues that our summers can cause. But starting work earlier isn't it. Doing this is going to be so incredibly disruptive to community members, and visitors who have chosen to No spend their days off here. Yes I believe it should be limited to location. It should also be mon - fri No The change is based on a single request bolstered by a poll that the majority of the construction group did not answer. There has been no review of scientific data how negatively impact residents, review of historical weather data. There is insufficient room in this comment box to present adequate response, and shows a strong bias towards the.... No I think 6am is a little early for construction noise. Nο Last thing we need is to have an hour earlier start. Already, trades show up in neighborhoods prior to 7am with their loud vehicles, machinery and people to be able to start at 7am. If they are granted another hour earlier, we will now have them showing up at 5am to be ready to start at 6am. If it is too hot, send them home earlier to be safe. No No Also do not support any changes to allow for later than 9 PM noise. No No No No No I am concerned about noise in residential areas from construction starting even earlier than it is already permitted. No No No Nowhere is 6am. That's crazy No No No Nο No No No No

No

As a former supervisor on a landscaping crew, hard physical labour is a guarantee as is extreme weather.

The two combined were practically inhumane. Technology has advanced us enough to provide us alternative options for noise stimulation, but we have yet to provide essential workers with adequate working conditions.

This is the least we can do.

The current 7 am to 10 pm strikes a balance for all. The 10 pm deadline is more suitable for homeowners who are working on their own home. The switch to 6 am prioritized business interests at the expense of quiet enjoyment for residents. Noise is noise.

I wholly support this initiative. Construction noise pales in comparison to the noise of air brakes from semis thundering down the hill throughout the night all year long. Perhaps more action on that front would be better use of time and resources?

The evening time should remain the same (10pm). It will be no change to the current situation allowing roofers for example to work longer evening hours when the weather is cooler, which is the goal of the earlier hours. Losing an hours sleep isn't good for a general productive day.

Windows are open more in the summer and construction starts already very early. Also, are there considerations on weekends vs. weekdays? It would be more pleasant if it were quieter on the weekends. People need to rest!

I live behind the construction site on 20 St NE and last summer I was woken several times to early construction noise. The current rule is 7 am, but construction often began between 6:00 and 7:00, one morning it was 4 am!! My concern is that builders will continue to not respect start times, and push them back even earlier to 5 am.

During the summertime we have approximately 16 hours of daylight every day. I think that's more than enough time for construction workers to get in 8 hours or more and not disturb neighbourhoods with construction noise when most people are still sleeping.

6 is still early and even 7. But 7 am is allowable. Not all are early riser and some and working late or even overnights and to hear a construction at 6 or 7 just before they go to bed is a nightmare. Notices prior to start construction should be done. Some of us earn our sleep. Lots of us work in the heat too.

7am is early enough for the noise to start. They can arrive at the work site and get set up but only start the noise at 7am l'm still sleeping at 7am!

Aligns with other cities, and 6AM isn't unreasonable.

Hello. I disagree with allowing construction to begin before 7 am. There are 20000 other people in this city that don't work in construction. My daughter and family moved into a new subdivision. Are they now expected to live with being up at 5 30 with the kids because of the noise. That will go on for a few years as the construction continues on h

The city of Phoenix allows construction to begin at 7 am. The temperature there was 45 degrees for 2 months straight last year. Starting work at 7 am is pretty much the norm in all municipalities. Just for one company wining about too hot to work? I sympathize with working in the heat but if my kids were woke up at 6 am by construction continually l'd be very angry, sleep is important for development.

Thank you for Considering the health and wellBeing of the cornerstone of our society the labourers, the toughest jobs! The heat is unbearable at times in the summer at 3/4/5-6pm. This will be awesome for me and my son. Thank you for considering us in your agenda. Gurinder & Kam daily wage labourers in salmon arm!

Starting construction as early as 6am would be very disruptive to families who have children. Children need uninterrupted sleep and would be negatively affected by this change.

I feel it would be safer for the workers to not be working in the heat all day. An earlier start means cooler temperatures. It's very hard on the workers to work in the heat healthwise it's not a good idea.

For all the people that DON'T work in construction in Salmon Arm, this is a major sleep disruption that will wake people up an hour earlier than they need to be. Most people wake up at 7am to start work at 8am.

It is appalling that you would consider something like then when the benefit is to a few, at the expense of many.
